

PETER T. PAUL COLLEGE OF BUSINESS AND ECONOMICS

Lucy Gilson, Dean

Luciana Echazu, Associate Dean for Undergraduate Education

Victoria A. Parker, Associate Dean of Graduate Education and Faculty Administration

The Peter T. Paul College of Business and Economics (Paul College) empowers students to be mindful, dynamic leaders through rigorous academics and experiential-learning opportunities led by industry experts and researchers—creating an engaged academic and professional community. Paul College prepares students for careers in Business, Economics, and Hospitality Management. Each program has its unique disciplinary traditions and the simultaneous commitment to broad educational excellence in critical thought, communication, analytic skills, digital literacy, and ethical reasoning.

Paul College's undergraduate curricula combine a breadth of liberal education with specifics of professional education in business administration, economics, and hospitality management. In tandem with their studies at Paul College, undergraduates enrolled in Paul College programs take part of their coursework in other colleges in the University in order to fulfill the Discovery Program requirements. Beyond those requirements, students are encouraged to elect additional courses in the arts, social sciences, humanities, mathematics, and sciences. Thus, students who complete the Paul College programs in business administration, economics, and hospitality management develop an impressive portfolio of marketable skills and knowledge base that may be applied to a variety of fields.

Accreditation

Peter T. Paul College of Business and Economics is accredited by the Association to Advance Collegiate Schools of Business (AACSB) for the degree programs of business administration and hospitality management.

Degrees

- Bachelor of Arts (B.A.) in Economics
- Bachelor of Science (B.S) in Business Administration and Analytical Economics

For information concerning advanced degrees, see the Graduate Catalog.

Degree Requirements

Paul College degree candidates must satisfy all of the University Discovery Program requirements for graduation as well as the particular requirements of their individual major programs. Modifications tend to occur in major(option) programs during the four-year period of a student's undergraduate career; Students are expected to conform to these changes. In addition, candidates must complete a math course (MATH 422 Mathematics for Business Applications, MATH 424A Calculus for Social Sciences, or equivalent) and an ethics course (PHIL 431 Business Ethics or equivalent). Bachelor of Science in Business Administration degree students are required to earn 134 credits. Economics majors must also satisfy specific requirements associated with the bachelor of arts degree (see bachelor of arts degree requirements).

In order to graduate, students must achieve a grade-point average of at least 2.3 (2.0 for the B.A. in economics) in the major courses and a minimum grade of C- (for ADMN 403 Computing Essentials for Business, students must obtain credit) in each major course. Course listings are provided by program, or in the case of business administration by department:

- Accounting and Finance (ACFI)
- Business Administration (ADMN)
- Decision Sciences (DS)
- EcoGastronomy (ECOG)
- Economics (ECON)
- Hospitality Management (HMGT)
- Management (MGT)
- Marketing (MKTG)

Prior to attaining junior rank, students will be considered "provisional Paul" students. Students are limited to two Paul College major required courses per semester during this period. A minimum overall GPA of 2.3 at UNH must be maintained by all Paul students in order to remain in the College. If the minimum overall GPA drops below 2.3 during the provisional period, the student will be placed on Paul College probation for one (1) semester. Failure to achieve a minimum overall GPA of 2.3 after the probationary semester will require the student to change to a major outside Paul College.

Paul College courses may not be taken on a pass/fail basis by a student majoring in business administration, economics, or hospitality management. Any Paul College major required course (including ADMN 403 Computing Essentials for Business) in which a grade below C- is obtained must be repeated. No more than two Paul College courses may be repeated and each course may be repeated at most one time.

Students transferring into Paul College from other universities must have business, economics, and hospitality management courses reviewed and approved by the faculty through the Paul College Undergraduate Programs Office to be considered for major requirements. Transfer credit is normally granted only for 400- and 500-level courses, and normally only when the transferring institution is AACSB-accredited.

Paul College Programs

FIRE (First-year Innovation and Research Experience)

FIRE is an integrated, team-based, and game-like experience, developed for first-year students. Launched in the 2015-2016 academic year and under the direction of the Undergraduate Programs and Advising Office, this program was designed to expand upon the principles and mission of the Peer Advising program by engaging first-year students in developing habits and strategies for success. Students complete a one-credit, credit/fail course each semester (PAUL 405 Freshman Academic Experience I/PAUL 406 Freshman Academic Experience II), guided by peer mentors (selected upper-class students) and alumni. Students collaborate and compete, both individually and in teams, through academic challenges, research, and game scenarios culminating in participation at the Undergraduate Research Conference (URC)

More information can be found on the [FIRE](#) webpage.

Independent Study/Internship

Juniors or seniors in high academic standing in the Paul College may elect the internship or independent study course for variable credit. For either course, the student must secure a faculty sponsor in the area of interest and submit a written proposal prior to the start of the semester in which the project is to be undertaken. Independent study normally involves research, while internships are usually undertaken with cooperation of an off-campus organization and involve a non-routine but practical application of skills and concepts acquired in a student's program.

Independent studies and internships require considerable self-direction and self-monitoring on the part of the student, who must be in high academic standing. Careful prior review of requirements with the undergraduate adviser and faculty sponsor is necessary. Students may earn no more than 16 credits combined in internships, independent studies, field experience, and supervised student teaching experience.

The [Washington Center internship](#), a semester of supervised work experience in Washington, D.C., as well as the [Semester in the City internship](#), in Boston, are open to any major.

International Programs

International education is a high priority of Paul College with many Education Abroad opportunities available. Through semester abroad and short-term programs, students have the ability to immerse themselves in a variety cultural environments to better prepare for a career in a globalized business industry. Paul College students may engage in a diverse array of opportunities:

- Study abroad in countries including, but not limited to: Australia, China, Hungary, Ireland, Italy, Korea, Portugal, and Spain
- Faculty-led programs to destinations such as Ascoli Piceno, Italy and Dominican Republic
- International internships
- Research grant programs
- Volunteer or non-profit work

Students are encouraged to begin planning their international experiences early on in their academic careers by visiting the Paul College Undergraduate Programs and Advising Office. In most cases, students are able to take a semester abroad without losing any time towards graduation. Paul College students are highly encouraged to study abroad at schools accredited by the AACSB (Association to Advance Collegiate Schools of Business) and/or EQUIS (European Quality Improvement System). More information about international experiences can be found on the Paul College [website](#) as well as by programs offered through [UNH Global](#).

Five-Year Programs

Four-One Program: BS – MSBA

The accelerated MS in Business Analytics program offers students the opportunity to start their graduate education while completing their undergraduate degree. This innovative program reduces the time required to earn a highly sought-after master's degree in Business Analytics. Students take up to two dual-credit courses during their senior year, saving time and graduate tuition. Designed for students with a strong interest in data and analytics, this program emphasizes real-world applications, including coursework in Python programming and access to the UNH Center for Business Analytics. Application for admission is

completed during the junior year, typically the semester prior to reaching 90 credits, and details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

Four-One Program: BS – MSE

The accelerated MS in Economics program is designed for students interested in careers in business, government, or academia. The program provides flexibility through its industry and academic tracks and enables students to gain real-world experience through an industry consulting project. Students begin their graduate studies with up to three dual-credit courses, saving both time and tuition while positioning themselves for success in fields requiring strong analytical and economic expertise. Application for admission is completed during the junior year, typically the semester prior to reaching 90 credits, and details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

Four-One Program: BS – MSF

The accelerated MS in Finance program allows students to begin their graduate education while completing their undergraduate degree, preparing them for careers in financial management, investments, or fintech. This program enables students to take up to four dual-credit courses during their senior year, saving time and graduate tuition. Students can tailor their education by selecting a track in Financial Analytics and Fintech, Investments, or a Self-Directed option. Application for admission is completed during the junior year, typically the semester prior to reaching 90 credits, and details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

Four-One Program: BS – MBA

After completion of the bachelor's degree program, students may apply to the Paul College Master of Business Administration full-time program. This innovative curriculum is designed specifically to accelerate your progress through this highly-ranked AACSB-accredited MBA program. Details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

Four-One Program: BS – MSA

The American Institute of Certified Public Accountants (AICPA), thenational association of professional accountants, mandated that five years of university education be required for national certified public accountant (CPA) certification as of the year 2000. Most states have approved similar requirements for licensing/certification. Paul College offers an accelerated master's program that can be completed in as little as 4.5 years, designed for students who desire a professional accounting career. The program leads to the joint awarding of a Bachelor of Science in Business Administration and a Master of Science in Accounting degree. Application for admission is completed during the junior year, typically the semester prior to reaching 90 credits. Details are provided in the Programs of Study sections of this catalog and the Graduate Catalog.

Paul College—Minors and Courses for Non-majors

Minors

Paul College faculty has developed a group of courses for non-majors, which, when combined with certain other courses, can constitute a minor in Accounting and Financial Information, Business Administration,

Economics, Entrepreneurship, Hospitality Management, Leadership, Real Estate Finance and Investments or Sales.

Non-majors

Paul College also serves the needs of undergraduates elsewhere in the University, within the limits of its resources, for whom selected courses in business administration, economics, or hospitality management are desirable complements to their primary course of study. To the extent that space is available after majors have enrolled, a limited number of Paul College courses are open to non-majors who have the prerequisite preparation. A maximum of 32 credits in courses offered by the Peter T. Paul College of Business and Economics may be taken by non-Paul College students. Students interested in these courses should contact the Paul College Undergraduate Programs and Advising Office.

Advising System

Undergraduate advising in the Paul College is carried out jointly by dedicated academic advisors and faculty. The academic advisors are based in the [Paul College Undergraduate Programs and Advising Office](#), where student academic records are kept. The advisors assist students in program planning, preregistration, understanding and meeting general academic/degree requirements, and general career planning. In addition, the advisors coordinate study abroad and domestic exchange programs, as well as the honors programs.

Undergraduates are encouraged to develop an advisory relationship with one or more faculty members with whom they have mutual interests. By providing their own experience and expertise, faculty may provide additional support to students for course, program, and career selection. All students are urged to seek as much assistance as they need from appropriate sources, but are reminded that theirs is the ultimate responsibility for knowing and meeting the various academic requirements for a degree.
