

ECONOMICS MINOR

<https://paulcollege.unh.edu/economics/program/minor/economics>

Description

Economics is a social science that studies how people coordinate their wants and desires, given the decision-making mechanisms, social customs, and political realities of the society. The key words in economics are coordination and incentives.

For business students, a minor in economics provides an understanding of the foundational issues in business such as agency concerns, for liberal arts majors a minor can provide a tool kit for understanding and critically evaluating public policy issues. Economics is an excellent background for many careers including banking and financial services, consulting, public service, NGOs, entrepreneurial ventures and government. It is also excellent preparation for further study in law, business, and international relations.

Requirements

The minor in economics consists of five courses (20 credits). A minimum of three courses must be taken at UNH. All transfer courses must be evaluated for equivalency. No more than 2 transfer courses may be applied to the minor. The minor follows UNH policy on requirements for minors.
