

CHEMISTRY MINOR

<https://ceps.unh.edu/chemistry/chemistry-minor>

Description

In this minor, you'll be introduced to the study of chemistry, providing you with the communication, critical-thinking and problem-solving skills necessary for success in many careers. The chemistry program offers a wide selection of courses in analytical, inorganic, organic and physical chemistry. You'll have the opportunity to participate in a variety of rigorous laboratory experiences and cutting-edge research. Combine the chemistry minor with a major such as business, education, engineering or a health-related field to enhance your options for a career or graduate studies.

If you are interested in completing the Chemistry Minor, please contact Prof. Stacey Hughes, Undergraduate Coordinator, Chemistry Department at Stacey.Hughes@unh.edu. She will review your coursework and discuss your plans to minor in Chemistry.

Requirements

Academic policies related to Minors.

1. Complete a total of 20 credit hours in Chemistry (CHEM) courses.
2. A minimum of 12 credit hours at the 500 level or higher are required.
3. Chemistry courses for the minor cannot be completed on a pass/fail basis.
4. Grade of C- or better is required in all chemistry minor coursework.
5. A cumulative GPA of 2.00 is required for all chemistry minor coursework.
6. Biochemistry (BMCB) courses do not count toward a chemistry minor.
7. Transfer credits can only be applied to the minor with permission of the Chemistry Department Undergraduate Coordinator or Chair. Maximum of 8 transfer credit hours. Transfer courses must meet minimum grade requirements.
8. The following courses cannot be counted toward the Chemistry minor: CHEM 400, CHEM 408, CHEM 409, CHEM 411, CHEM 413, CHEM 501, CHEM 502, CHEM 503 and CHEM 798.
