

ENVIRONMENTAL SCIENCES

The College of Engineering and Physical Sciences (CEPS) and the College of Life Sciences and Agriculture (COLSA) jointly offer a bachelor of science degree in environmental sciences. The Program has four options, and specific course requirements for the major vary by option. The geosystems and hydrology options are both managed by the [Department of Earth Sciences](#) in CEPS, and the ecosystems and soil and watershed management options are both managed by the [Department of Natural Resources and the Environment](#) in COLSA.

Environmental sciences, an interdisciplinary field, focuses on the interaction of biological, chemical, and physical processes that shape our natural environment. Students graduating with a degree in environmental sciences will have an understanding of these interacting processes, the ability to communicate effectively with both scientific and lay audiences, competency in field methods appropriate for entry-level environmental science positions, competency in the use and application of Geographic Information Systems (GIS), a basic understanding of environmental policy, and the ability to contribute to multidisciplinary teams. The University of New Hampshire is a recognized leader in environmental sciences research, and the environmental sciences program capitalizes on faculty expertise in this area. The full-time faculty members comprising this program have major teaching and research emphases in the areas of biogeochemical cycling, environmental chemistry, ecosystem science, geospatial science, global change, hydrology, plant ecology, soil science, and water resource management.

Employment opportunities include environmental consulting firms, educational facilities (e.g., science centers), environmental monitoring laboratories (e.g., water treatment plants; the Environmental Protection Agency), government agencies (e.g., the U.S. Geological Survey, Bureau of Land Management, Natural Resource Conservation Service), university and government research laboratories, and nongovernment environmental organizations. The environmental sciences program also constitutes an excellent preparation for graduate programs in several areas relating to the environment. Students should consult with their adviser early if their goals include further study.

Programs

- [Environmental Sciences Major: Ecosystems Option \(B.S.\)](#)
- [Environmental Sciences Major: Geosystems Option \(B.S.\)](#)
- [Environmental Sciences Major: Hydrology Option \(B.S.\)](#)
- [Environmental Sciences Major: Soil and Watersheds Option \(B.S.\)](#)

Faculty

See [Faculty Directory](#) menu under the 'Explore Program Details' section on the below program pages.

College of Life Sciences & Agriculture (COLSA)

- [Environmental Sciences Major: Soil and Watersheds Option B.S.](#) - Program Faculty
- [Environmental Sciences Major: Ecosystems Option B.S.](#) - Program Faculty

College of Engineering & Physical Sciences (CEPS)

- [Environmental Sciences Major: Geosystems Option B.S.](#) - Program Faculty
- [Environmental Sciences Major: Hydrology Option B.S.](#) - Program Faculty
