

NUTRITION MAJOR: HEALTH AND WELLNESS OPTION (B.S.)

<https://colsa.unh.edu/agriculture-nutrition-food-systems/program/bs/nutrition-major-health-wellness-option>

Description

Nutrition is the study of how nutrients and food components function at molecular, cellular, and whole-body levels to impact human health and disease. Students are grounded in fundamental sciences as they develop nutrition-specific competencies in nutrition and health, foods, nutritional assessment, wellness, life cycle nutrition, and/or metabolic biochemistry.

The nutrition program prepares students for entry-level positions in health care, education, research, or the biotechnology industry, or entry into post-baccalaureate professional programs. Nutrition faculty have expertise in clinical nutrition, telehealth, epidemiology, and food science, as well as assessing risk factors of chronic disease risk (i.e. obesity, diabetes, cardiovascular, cognitive) in diverse populations (pediatric, young adult, older adult).

Students who complete the Health and Wellness option are prepared for jobs in agencies or businesses that have an emphasis on disease prevention and health promotion, including schools, employee wellness agencies, fitness centers, and non-profit or community organizations.

Nutrition and Wellness Capstone Experience

One capstone experience, supervised and approved within the major, is required of all seniors. The capstone explores areas of interest based on the integration of prior learning. The capstone requirement for Wellness students is satisfied through the completion of NUTR 720 Community Nutrition or NUTR 755 Concepts and Controversies in Weight Management during their senior year.

Both NUTR 720 and NUTR 755 are required courses; one of these courses must be taken during the student's senior year to fulfill the university's capstone requirement.
