Student Learning Outcomes

Program Learning Outcomes

- Demonstrate knowledge of health care systems and the organization and integration of clinical and community support services that lead to optimal patient care.
- Assess health care financial models and processes to enhance managerial decision making and organizational performance and to strategically support patients and communities.
- Examine the fundamental rights, ethical principles, and overarching policies that guide health care professionals.
- Evaluate the efficacy of employing information technology tools to improve health care delivery and optimize health outcomes.
- Explore how socio-cultural, familial, and individual perspectives influence the operation, delivery, and use of health care systems.
- Demonstrate competency in communication, interpersonal relations, management, and leadership to support organizational effectiveness and inter-professional collaboration.
